I am motivated by challenges, I am someone who is passionate about innovation, new technologies and I have a great attention to detail.

My career started mostly with J2EE back-end projects, later I switched to the front-end side. Now I am looking for opportunities to develop new skills and keep learning!

Work experience

Senior software developer	Since October 2013
TuGo	Vancouver, Canada

TU Group sells travel insurances via brokers. Each broker has an instance of an E-commerce website to sell specific travel insurance plans to its customers. This website can be customized with colors, labels and images from an admin website. All changes are displayed in real-time with Meteor. The project uses a continuous integration practice and an agile organization.

I defined the project architecture and I entirely set it up. I organised testing and I established a continuous integration process.

I also work on many other projects: I made a Swift app as a proof of concept, I also defined the architecture of a web application that will be used by the customer service and as a senior developer I step in when needed.

Meteor, NodeJS, MongoDB, AWS, Jenkins, Grails, Test Driven Development, HTML 5, CSS 3, JQuery

Mobile javascript developer	July 2013 - September 2013
SFEIR - BETC - La Roche Posay	Paris, France

La Roche Posay is a cosmetics company. It wants to develop an app for Android and IPhone to present their products and provide an everyday tool to help customers to take care of themselves.

I developed more than 70% by myself and I tweaked 3 plugins to make them compatible with devices.

Responsive design, Geolocation, Localization, Facebook connect, Photos, Barcodes
Cordova/Phonegap, Angular JS, HTML 5, CSS 3, JQuery, SQLite, REST, Facebook SDK

| Java and javascript developer | February 2013 – June 2013 |
| SFEIR - Veolia Eau | Paris, France |

Veolia has an application to file all its customers' data. This application is 12 years old and is becoming difficult to maintain. I maintained the current application and I developed a proof of concept using new technologies in order to refactor the current application.

Angular JS, Bootstrap, HTML 5, CSS 3, REST calls, Spring MVC 3, Hibernate 4, Oracle, Maven

| Javascript developer | October 2012 – February 2013 |
| SFEIR - Kyriba Corporation | Paris, France |

Kyriba provides SAAS treasury management tools for companies around the world. Kyriba is always looking to remain at the forefront of technical innovation and it has intern project needs as well. In order to combine these aspects, I worked on 3 projects which use Google Apps : an estimate generator, an unpaid invoice gatherer and a website presenting indicators about budgets and revenues.

Google Script, Google Spreadsheet, Google Document, Google Drive, Google Cloud SQL, Intacct and Salesforce

| Java developer | April 2008 - September 2012 |
| Logica | Paris, France |

GDF Suez
Replacement of a customer space portal for key customers and craftsmen.

Direction Générale des Finances Publiques (DGFIP) : French revenue agency
Frameworks and DBMS migration on tax declaration application to guarantee good performance and availability.

Direction Générale des Douanes et Droits Indirects (DGDDI) : French customs
Automation of importations and exportations in Europe.

J2EE, JBoss, Weblogic, Oracle, Spring, Hibernate, Maven, Ant, JMeter, Struts, Webservices, JaxB, HTML/CSS, Javascript

Education

| ESIAL (now Telecom Nancy) | Master/engineer's degree, Computer Software Engineering | 2005 – 2008 |
| IUT Charlemagne | DUT (2 years degree), Information Technology | 2003 – 2005 |
